Backend Developer with 5+ years of experience building and scaling RESTful APIs and microservices. Currently working with Ruby on Rails, React, TypeScript, Docker, and Datadog at Vidio. Skilled in SQL, Python, and Object-Oriented Programming.

SKILLS

Ruby

Ruby on Rails Sidekiq

Javascript

TypeScript React

Python

FastAPI Pandas

Database

MySQL sqlite MongoDB
SQL

DevOps

Docker CI/CD Datadog
Redis

AI-Assisted Development

Claude Code Codex
AI Pair Programming

Cloud & Integrations

AWS S3 Firebase Midtrans
Telegram Bot API

WORK EXPERIENCE (4)

Backend Developer | PT VIDIO DOT COM

Jan 2022 - Current

📍 **Jakarta**

Working with Ruby on Rails, React, Docker and Microservices

- Developed and deployed RESTful APIs using Ruby on Rails for frontend clients and backend services
- Enhanced backend application stability and performance by proactively monitoring and analyzing Datadog metrics and logs, which improved response latencies
- Optimized application performance by implementing HTTP caching and Redis caching
- Accelerated development cycles and CI/CD pipeline by optimizing Docker build processes and strategically utilizing layer caching
- Improved test reliability and engineering efficiency by identifying and refactoring the root cause of flaky tests
- Implemented frontend components for web platform using React and TypeScript
- Pair Programming and TDD as day to day practice

- Authored and maintained technical documentation for features and API endpoints
- Use AI coding agents like Claude Code and Codex daily as core part of workflow, accelerating implementation, debugging, and code review

Backend Developer | PT Talenta Informasi Teknologi

Mar 2020 - Dec 2021

📍 **Semarang, Jawa Tengah, Indonesia**

Design and implement server-side features and API using FastAPI framework

- Involve in database structure decision making
- Integrate third party service like Firebase, Midtrans

Assistant Lecturer | Dian Nuswantoro University

Jan 2018 - Jan 2019

📍 **Semarang, Jawa Tengah, Indonesia**

Assisting lecturer in Database course

Assistant Lecturer | Dian Nuswantoro University

Jan 2017 - Jan 2018

📍 **Semarang, Jawa Tengah, Indonesia**

Assisting lecturer in Programming and Algorithm course

PROJECTS (6)

SJP Backoffice | Sinar Jaya Pratama

Jun 2026 - Current

Laravel PHP Filament MCP Claude Code SQLite Redis Tailwind CSS

Built with Claude Code, a back-office admin system for Sinar Jaya Pratama covering the full quotation-to-invoice-to-cash flow, expense/bill tracking, equipment and project management, and employee timesheets. Exposes an MCP server so invoicing and quotation operations can be driven directly by AI agents.

- Built end-to-end with Claude Code as an AI pair-programming workflow
- Exposed core invoicing/quotation operations to AI agents via an MCP server
- Built Filament-based admin panel on Laravel 13 / PHP 8.3
- Designed quotation, invoice, and bill workflows with payment term and clause templates, tax/discount-aware allocations, and PDF/print views
- Implemented equipment-linked project tracking and employee timesheets with break-duration tracking
- Added audit trail via activity logging and role-based access control

Golek Truk | Siba Group

Jan 2021 - Current

RESTful API MySQL Python FastAPI AWS S3 Docker Git MongoDB

Build backend service. An advertisement service for Shippers and Truckers related without in-application transaction between seller and buyer.

- Collaborate with 1 other Backend Developer, 2 Frontend Developers, 2 Business Analysts
- Design and build REST API using FastAPI framework
- Design database, using MySQL
- Research and integrate Firebase Authentication for authentication service
- Research and integrate Midtrans for payment gateway
- MongoDB for logging service
- AWS S3 for uploaded file storage service
- Docker for deployment

- Git as Continuous Integration

Siba Promoter | Siba Group

Apr 2020 - Nov 2020

RESTful API MySQL SQL Python FastAPI AWS S3 Docker Telegram Git

Built two backend services; **(1)Interactive Web Trucker**, an application for promoting Siba Group's orders to the partners via Web Application or Telegram Chat Application. **(2)Backoffice**, a financial application that records the transaction **Interactive Web Trucker** invoices and bills and generate journals and reports

- Collaborate with 1 other Backend Developer, 1 Frontend Developer, 2 Business Analysts
- Integrate with **CarLo** via database level
- Design and build REST API using FastAPI framework
- Design database, using MySQL
- AWS S3 for uploaded file storage
- Docker for deployment
- Research and integrate with Telegram Bot API using python
- Git as Continuous Integration

Pemesanan Online Tiket Wisata

Jun 2020 - Aug 2020

PHP MySQL HTML CSS JavaScript

Prototype aplikasi pemesanan tiket wisata secara online

Integrasi Sederhana Telegram-bot dan Google Spreadsheet

Feb 2020 - Feb 2020

JavaScript

Integrasi sederhana mengirim pesan setiap pembuatan row baru pada Google Spreadsheet

Aplikasi Recency, Frequency, Monetary (RFM)

Mar 2019 - Mar 2019

PHP HTML CSS JavaScript

Prototype aplikasi analisa RFM otomatis

EDUCATION (2)

Bachelor Information System | Dian Nuswantoro University

2016 - Current

Highschool Mekatronika | SMK Negeri 1 Batam

2012 - 2015

LANGUAGES

English

Intermediate

Indonesia

Native speaker
